

CANOPY TUBE SYSTEM DATSHEET

PROPERTIES

In order to promote mechanical tunneling excavation, Canopy Tubes for Pipe Umbrella Systems are utilized as an inclined drilled roof pre-support solution. By guaranteeing the stability of rock or soil formations, these devices improve workplace safety.

For reliable connections that are predictable and consistent, REGBAR provides premium calibrated tubes. REGBAR canopy tube system alternatives to utilize higher quality steel pipe with different connectors (squeezed of nipple) to further increase the bending moment.

Forepoling and ground injections can also be carried out with this drilling technique, which makes use of arching and overlapping ground improvements. A variety of GFRP pipe injection systems are also offered by REGBAR.

MAIN ADVANTAGES

- Up to 18 meters; further lengths upon request.
- A large selection of diameters, up to 168.3 mm, including the industry standard of 114.3 mm.
- An easy-to-understand color scheme facilitates the installation process.
- Portfolios of GFRP tubes and piles; specification documents upon request.
- A large selection of lengths and diameters in stock.
- The inventive pipe coupling's superior load-bearing capacity.
- Various connections are offered based on the needs of the project.
- Installing self-drilling equipment that is fully automated.

HEADQUARTERS

Caferağa Mah. Albay Faik Sözdener Cad.
No:7/23 Kadıköy- İstanbul / TURKEY
Phone : +90 216 405 21 55 / PBX
